Description

This course is designed to educate judicial personnel on how to recognize and respond to an opioid overdose.

Goal

The goal of this training is to teach individuals how to recognize the signs of an overdose and administer Narcan, a medication used to reverse the effects of an opioid overdose. The training aims to equip individuals with the knowledge and skills necessary to effectively respond to an overdose and potentially save a life. It also raises awareness about the importance of overdose prevention.

Learning Outcomes

After successful completion of this course, you will be able to:

1. Understand Fentanyl and the effects it has.
2. Understand how Narcan helps reverse opioid overdose.
3. Identify an opioid overdose.
4. Administer Narcan and respond to an opioid overdose.

Schedule

This is a thirty-minute training course.

Materials

- PowerPoint presentation
- Videos, photographs, and audio recordings
